SUMMARY

Motivated MCA student with strong knowledge of full-stack web development using React.js, Next.js, Node.js, Express.js, and MongoDB. Skilled in building responsive web applications, integrating RESTful APIs, and developing MERN stack projects. Currently exploring AI-integrated web development and modern software technologies.

EDUCATION

Master of Computer Application **Aug 2025 – Expected May 2027**

SGSITS Indore

Bachelor of Computer Application **Aug 2022 – May 2025**

Mandsaur University

12th – Maths - Science **2022**

Govt. School of Excellence, Mandsaur

SKILLS

Frontend: HTML, CSS, JavaScript, Bootstrap, React.js, Next.js, Tailwind CSS.

Backend: Node.js, Express.js, RESTful APIs

Databases: MongoDB, MySQL

Version Control: Git, GitHub

Soft skills: Problem Solving, Communication, Team Collaboration

INTERSHIPS AND CERTIFICATIONS

Full Stack Developer Intern (May 2025 – Oct 2025)
(6 Months)

- Worked on real-world web applications using React.js, Next.js, Tailwind CSS, and RESTful APIs.
- Developed responsive UI components and improved application functionality and user experience.
- Contributed to multiple client projects while using Git for version control and following modern frontend development practices.

Frontend Developer Intern (IBM SkillsBuild Intership) (June 2024 - Aug 2024)

- Developed a text translator application using React.js, Tailwind CSS, and RapidAPI.
- Built React-based applications using hooks like useState, useEffect, and useCallback.
- Implemented client-side routing using react-router-dom and improved responsive UI design.

PROJECTS

StayAdda (MERN Stack Project)

- Built a full-stack hotel platform with authentication, listings, search, reviews, and bookings using MVC architecture
- Developed a Gemini-powered AI assistant that understands natural-language requests and recommends hotels using listing data
- Created an AI trip planner that generates personalized itineraries based on destination, budget, group size, trip length, and interests.

ColdVault (Group Project)

- Contributed to the development of a warehouse management and billing system using React.js + Vite and MySQL.
- Developed responsive frontend components and integrated APIs for smooth data handling and user interaction.
